

Food nanotechnology: New leverage against iron deficiency : Article : Nature Nanotechnology ^[1]

Submitted by admin on Sat, 03/16/2013 - 15:00

Title	Food nanotechnology: New leverage against iron deficiency : Article : Nature Nanotechnology
Publication Type	Journal Article
Year of Publication	2010
Authors	Miller, D ^[2]
Journal	Nature Nanotechnology
Issue	5
Pagination	318-319
Date Published	04/2010
Type of Article	Scholarly journal
Keywords	1. description: reducing the particle size of iron can improve their bioavailability ^[3] , 3. benefit: can fight against iron deficiency ^[4] , 5. development stage: {R&D ^[5] , 8. description of entry: scholalry article ^[6] , 9. search terms: nanomaterial ^[7] , food ^[8] , } 6. city use: agriculture ^[9]
Abstract	Reducing the particle size of some iron ^[10] compounds can improve their bioavailability in rats, without increasing their tendency to cause colour and odour changes when added to foods.
